Person 1	Person 2
Create an interactive Tableau dashboard showcasing the Economic Freedom Index (EFI) across different countries	Cluster countries based on EFI subcomponents (e.g., tax burden, property rights) to discover patterns.
Compare EFI with GDP per capita to identify correlation between economic freedom and wealth.	Develop a "Freedom Scorecard" that ranks countries by overall EFI and its key contributing factors.
Incorporate a time-series animation showing changes in EFI over the past decade	Provide country-level deep dives explaining why some nations rank high or low in EFI.
Use color-coded maps to show high and low EFI regions (e.g., heatmaps or choropleth maps).	Compare EFI with Human Development Index (HDI) and Corruption Perception Index.
Person 3	Person 4
Highlight top 5 improvers and decliners in EFI over the past 5 years with insights.	Predict future EFI trends using historical data and regression modeling
Evaluate the impact of political stability or democracy level on economic freedom.	Identify outliers: countries with high EFI but low GDP or vice versa and explain anomalies.
Create a comparative study between continents or economic blocs (e.g., EU, ASEAN, BRICS).	Propose policy recommendations for low-scoring countries to improve their EFI standing.

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.
